Introduction to Modern Cryptography, Fall 2020 Homework 1 - due November 10

October 27, 2020

The following exercises (from Dan Boneh's course: https://crypto.stanford.edu/~dabo/courses/cs255_winter19/hw_and_proj/hw0.html) shows what goes wrong when the one-time pad cipher key is used more than once. Below are eleven hex-encoded ciphertexts that are the result of encrypting eleven plaintexts with the one-time pad cipher, all with the same key. Your goal is to decrypt the last ciphertext, and submit the secret message within it as solution. Make sure to follow the submission instructions below.

Hint: XOR the ciphertexts together, and consider what happens when a space is XORed with a character in [a-zA-Z].

ciphertext 1:

 $315c4eeaa8b5f8aaf9174145bf43e1784b8fa00dc71d885a804e5ee9fa40b16349c146fb778cdf2d3aff021dff\\f5b403b510d0d0455468aeb98622b137dae857553ccd8883a7bc37520e06e515d22c954eba5025b8cc57ee\\59418ce7dc6bc41556bdb36bbca3e8774301fbcaa3b83b220809560987815f65286764703de0f3d524400a\\19b159610b11ef3e$

target ciphertext (decrypt this one):

 $32510ba9babebbbefd001547a810e67149caee11d945cd7fc81a05e9f85aac650e9052ba6a8cd8257bf14d1\\3e6f0a803b54fde9e77472dbff89d71b57bddef121336cb85ccb8f3315f4b52e301d16e9f52f904$

For completeness, here is the python 2 script used to generate the ciphertexts. (it doesn't matter if you can't read this)

```
MSGS = ( --- 11 secret messages --- )

def strxor(a, b):  # xor two strings (trims the longer input)
    return "".join([chr(ord(x) ^ ord(y)) for (x, y) in zip(a, b)])

def random(size=16):
    return open("/dev/urandom").read(size)

def encrypt(key, msg):
    c = strxor(key, msg)
    print
    print c.encode('hex')
    return c

def main():
    key = random(1024)
    ciphertexts = [encrypt(key, msg) for msg in MSGS]
```

What to submit. Submit a single zip file named "solution.zip" that contains:

- A text file named "solution.txt" including the decryption of the target ciphertext only.
- A folder named "code" containing all the source code you used to get to your solution. Your code is only used to show your work and it does not need to find the message automatically.
